EDUCATION Visvesvaraya Technological University (VTU) | Acharya Institute Of Technology,
Bengaluru *Bachelor of Engineering in Electronics & Communication (ECE)* | 2025–2029

- USN: 1AY25EC045 | Current Semester: Second Semester (In Progress)
- Relevant Coursework: Applied Linear Algebra, Circuit Theory, Emerging Electronics, C Programming

PROJECTS **Advanced Biometric Watch v3.0** | *ESP32-C3, Embedded Systems* | April 2026

- Engineered embedded firmware for an ESP32-C3 wearable physiological monitor, bridging low-level hardware protocols with real-time data acquisition.
- Formulated and validated mathematical biological models to analyze simulated sensor inputs, optimizing the extraction of real-time health metrics.

Student Management System | *C Programming, Data Analytics* | Early 2026

- Developed a modular, C-based database architecture to efficiently manage and structure academic records using foundational data handling principles.
- Programmed custom data analytics algorithms to parse terminal inputs and compute statistical performance metrics, demonstrating early-stage data science applications.

Resilience Hub | *React, Human-Computer Interaction (HCI)* | December 2025

- Architected a mental wellness web prototype focused on user resilience, exploring principles of Human-Computer Interaction (HCI) and digital resource accessibility.
- Investigated AI-assisted rapid development workflows, utilizing complex prompt engineering to deploy front-end UI components and backend logic within a 24-hour development cycle.

Interactive Personal Portfolio | *Web Development, UI/UX* | May 2026

- Designed and developed a dynamic, space-themed personal portfolio website utilizing AI development tools.
- Engineered a terminal-style user interface to showcase engineering projects, effectively bridging bare-metal microcontroller concepts with modern web technologies.

SKILLS

- **Languages:** C (Intermediate), HTML/CSS (Basic), React(Basic), Python (Familiar)
- **Hardware/IoT:** ESP32, ESP32-C3, Arduino IDE, Wokwi Simulation, Basic Circuit Design
- **Developer Tools:** VS Code, Lovable.dev, Git/GitHub

- **Core Concepts:** Basic Analog Electronics, Introductory Semiconductor Concepts, Sensor Fundamentals

AWARDS

- **Google Cloud Skills Boost:** Earned "Introduction to Generative AI" Badge (January 2026)
